Speaking domain

- Classroom Tableau/Oral Vocabulary Task

This document was created to assist school and district personnel with the immediate (“on the fly”) scoring of the first operational Speaking task on the ELPA21 Screener. During the administration of the screener, the secure task is required to be immediately scored by all TAs.

The screener test stops for the scoring of this Speaking task and cannot continue until scores for each item in the task have been entered in the scoring screens.

In this document, you will find:

- The Classroom Tableau/Oral Vocabulary task rubric for all grade bands.
- The Notes Sheet for the TA to use during testing. This can be printed as needed prior to testing. Using the Notes Sheet is not required.
- A listing of general and special scoring notes for the Classroom Tableau/Oral Vocabulary tasks.
- A practice Classroom Tableau/Oral Vocabulary task set with five questions and sample responses for the 2- and 1-point scores.

Please note: the sample responses included for each score point on the practice task in this document are not intended to be “all inclusive.” They are shown as a guide for the test administrator, to illustrate some student examples for the score points.

### SPEAKING – CLASSROOM TABLEAU/ORAL VOCABULARY TASK

SCORE	DESCRIPTORS
2	<p>Responses at the 2 level are typically characterized by:</p> <ul style="list-style-type: none"> <li>• The student uses appropriate vocabulary that is relevant to the stimulus and effectively uses grammar and structures. Though the response may contain a few errors in usage, the student’s meaning is clear.</li> <li>• The student effectively answers the prompt and the response is consistent with the stimulus.</li> </ul>
1	<p>Responses at the 1 level are typically characterized by:</p> <ul style="list-style-type: none"> <li>• The response may include words and phrases related to the stimulus, but frequent errors in grammar and vocabulary may significantly interfere with listener comprehension.</li> <li>• The response partially addresses the prompt, though some content may be inaccurate or otherwise unconnected to the stimulus.</li> </ul>
0	<p>The response does not address the communicative demands of the task.</p> <p>Responses at the 0 level are typically characterized by:</p> <ul style="list-style-type: none"> <li>• Refusal/no response</li> <li>• Only in a language other than English</li> <li>• Response of “Yes; no; I don’t know.”</li> <li>• Off Task/Topic</li> <li>• Unintelligible</li> </ul>

## SPEAKING ON-THE-FLY SCORING

### STEP TWO - SCREENER NOTES SHEET (ONE SHEET PER STUDENT)

Test Administrator,

You may use this sheet and the Classroom Tableau/Oral Vocabulary Task Rubric to take notes and score the first Speaking task in Step Two, while the student is speaking. For all grade bands, the students will be given the opportunity to record responses to four individual items in the task. If the TA needs to review the student’s recordings, there is an opportunity to do so immediately following the student’s completion of the 4<sup>th</sup> recording. The instructions for doing this review are outlined in the TAM and DFA documents.

Once written upon, this sheet becomes **secure**, and **must be securely destroyed immediately** after the test session just as you might do for any scratch paper the student may use during the test. **Do not reuse this sheet** for another student’s responses. **Do not retain these notes.**

#### **Scoring Notes:**

- Students must meet all criteria outlined to earn a given score (other than zero).
- When a student responds with a word or phrase that can be tied to the stimulus, it can receive a score point of 1.
- If no words are spoken by the student, it is a blank and receives a 0 score.
- If the TA is unsure whether or not the response addresses “the communicative demands of the task,” review the 1-point rubric. If the response doesn’t, at minimum, meet the rubric for 1-point, then the response does not address the communicative demands of the task.
- A 1-point response may relate to the picture but not specifically to the question.
- A one-word answer can receive a full score point of 2 when that word effectively answers the prompt and is consistent with the stimulus.
- For Kindergarten through Grade 3, there’s an item in the task set that asks “What will happen next?” The TA should allow for leniency in interpreting the word “next,” which could mean any future time in that school day, immediate or later.
- Some items in this task may elicit responses with school jargon. Some examples are: warm up/daily 5/seat work/bell work, centers, IXL, do calendar, do math, do reflections, self-read. Jargon can be considered within the context of the task as long as the TA perceives that the response is connected to the stimulus— even if the TA is not familiar with the specific activity referenced.

## CLASSROOM TABLEAU/ORAL VOCABULARY PRACTICE TASK

### Stimulus/Graphic

#### Practice Task questions\*

Item 1: What is the girl doing?

Item 2: Where is the boy sitting?

Item 3: What do you see on the table?

Item 4: Who else is in the room?

Item 5: School is almost over. What do you think will happen next?

\*Please note that the actual screener test includes four questions for each grade band rather than five. This practice document includes five items so that TAs may see the available test samples for practicing the scoring.
