

# The New Reporting System

## Information for Your Schools and Teachers

1

### Why are we moving to the new Reporting System?

The Reporting System will replace the Online Reporting System (ORS) at the end of September and will offer a more user-friendly interface that provides teachers and administrators with results for screener and summative assessments in a single system.

#### The Reporting System provides:

- Secure access to student data
- Results for summative and screener assessments
- Aggregate reports, roster reports, and individual student reports
- Strengths and weaknesses at the class, school, and district levels by identifying the five items with the highest and lowest scores
- The ability to see actual student work along with the item
- Guidance to teachers to pinpoint gaps in conceptual understanding and areas for further instruction

**Key Features**

Each report is available for district, school, teacher, class, or any special roster of students that users want to follow.

Individual student reports and student data files can be generated through an easy-to-use wizard.

Print reports in PDF or export data to Excel or CSV.

See the performance of different sub-groups of students by using the filters.

Users can view all assessments an individual student has taken over time.

Comparison data for the state, district, school, and roster is shown.

The information icon allows users to learn more on performance and scores.

Roster	Teacher	Student Count	Test Completion Rate	Average Overall Scale Score	Average Comprehensive Scale Score	Performance
State		4,770	9388	5253	5253	42%
District		228	5420	5310	5310	48%
School		219	5432	5242	5242	44%
My Students		18	5350	5290	5290	39%
Grade 5 All	Demio, Teacher A.	7	100% (0/7)	5560	5370	47%
Grade 5 A1	Demio, Teacher B.	11	100% (0/11)	5513	5425	43%
Grade 5 B99	Demio, Teacher C.	12	100% (0/12)	5412	5119	38%
Grade 5 C2	Demio, Teacher D.	10	100% (0/10)	5300	5274	40%
Grade 5 D4	Demio, Teacher E.	14	100% (0/14)	5560	5481	45%
Grade 5 E223	Demio, Teacher F.	15	100% (0/15)	5513	5322	42%

**Breakdown Attributes**

Select up to three options.

- Ethnicity
- Enrolled Grade
- IDEA Indicator
- Include unspecified values
- Gender
- English Learner Status

My Students Grade 5 Summative	Spring 2020	18	5350	39%	--
Grade 5 Screener	2019-2020	1	n/a	Progressing	11/02/2019

2

### What will I be able to do in the Reporting System?

#### The Reporting System allows users to:

- Explore the data underlying the aggregate
- Drill down into progressively smaller groups of students
- Disaggregate the results by content areas
- Track students back in time to examine trends

#### You can also:

- Customize your reports
- Immediately generate your own data files
- Generate PDFs on demand for use in professional development activities

### 3 When will I be able to access my students' scores in the Reporting System?

Educators and administrators will be able to access reports and data in the Reporting System starting in late September.

### 4 Will I be able to access my prior year's data in the Reporting System?

Yes, data for the ELPA Screener (2018-2019) and the ELPA21 Summative (2016-2017, 2017-2018, and 2018-2019) tests are accessible in the Reporting System. The ELPA21 Screener score reports from the 2017-18 administration will not be available in Reporting. If you are a Test Coordinator or Test Administrator who requires these scores for future reference, please be certain to retrieve them from the ORS before October 31, 2019, when ORS will be permanently retired.

### 5 Will the online student report in the Reporting System look the same as before? And will I still be able to print student reports in the new system?

Yes, the online student report will look the same as previously reported in ORS. You will be able to access student reports in the Reporting System and can print these reports using the ISR Wizard.

- Teachers can print a single report for one student or generate a batch of multiple reports delivered as a ZIP file.
- Teachers can choose to print student reports in languages the state has chosen to make available.
- The Student Results Generator also allows users to print or export a Student Data File, which is a teacher-friendly data spreadsheet of details from the ISRs and more.

### 6 How can I access training resources for the AIRWays Reporting System?

- The Reporting System Quick Guide, training module, and the full Reporting System User Guide will be available on the portal in September.
- More details will be available on the portal home page.

### 7 If I still have questions about the Reporting System and how to access my data, what should I do?
